Digitalization of control reports

Nuclear & high demanding manufacturing activities

ePV solution enhances manufacturing performance, traceability & protection of data integrity by digitalization of control reports.

Challenge

Boost manufacturing performance and comply with Nuclear Safety Authorities requirements by digitalization of control reports to fight against Counterfeit, Fraudulent & Suspect Items (CFSI) as well as save time in control report issuance and traceability.

Solution

Developed and deployed in its manufacturing plants, Framatome allows its ePV users to significantly save time in preparation of control reports by automating data's input and prioritizing verification actions.

ePV solution also prevents the risk of data's input or typo errors, improves traceability and protects data integrity :

- Initialization of control reports from IT system
- Verification of the qualification of controllers
- Verification of the validity of control equipment
- Guided results filling and verification of control report
- Validation, Approval and signatures
- Automatic issuance of final digital control report
- Automatic translation if required
- Automatic archiving
- Dashboard and KPIs integrated into the tool

© Framatome

Easy to use

Digitalization of control reports according to customer's standards (format & datas)

Adapted to RCCM and ASME codes

Software hosting in secured cloud managed by Framatome

Online support and maintenance

Yearly End-user License Agreement

Customer benefits

- Local use (laptops, computers) or Mobile use (tablets)
- Time saving, Reduction of typo errors by automation of data's input and Deletion of hard copies
- Increase of good reports on the first try
- Fill-in, verification & approval process with identified users
- Compliance with Nuclear Safety Authorities requirements to guarantee traceability
- Risk reduction of Counterfeit, Fraudulent and Suspect Items

Your performance
is **our** everyday **commitment**

Key figures

In Framatome manufacturing plants :

15 000 Controls reports/ year

73% of reports are good on the first try

98% Of reports validated within 48 hours
