

Framatome establishes a permanent presence in Switzerland

November 27, 2023 - Framatome announces the creation of Framatome AG, a new subsidiary specialized in local nuclear services for Swiss operators.

This center of competence and expertise is being developed to strengthen Framatome's local presence, close to Swiss operators. Our teams will provide support on lifetime extension projects for Swiss nuclear power plants with all the products and engineering and maintenance services that Framatome offers worldwide for all types of reactors.

"The creation of Framatome AG marks a new step in our longstanding cooperation with our Swiss customers for the reliable generation of safe and low-carbon energy over the long term" commented Bernard Fontana, CEO of Framatome. "The development of this center of nuclear expertise, close to our customers, is a pledge of our desire to continue to play a prominent role in Switzerland".

The teams of Framatome experts based in Switzerland will support projects for the three nuclear power plants in operation. Framatome works in disciplines related to the design, commissioning, maintenance and modernization of equipment, operation, and instrumentation and control, as well as the design and supply of fuel assemblies. Framatome also provides its customers with support in accomplishing their digital transformation, offering solutions to secure and simplify the operation of highly critical systems.

A wholly-owned subsidiary of Framatome, Framatome AG is based in Baden in the Canton of Aargau.

About Framatome

Framatome is an international leader in nuclear energy recognized for its innovative, digital and value added solutions for the global nuclear fleet. With worldwide expertise and a proven track record for reliability and performance, the company designs, services and installs components, fuel, and instrumentation and control systems for nuclear power plants. Its more than 18,000 employees work every day to help Framatome's customers supply ever cleaner, safer and more economical low-carbon energy.
