

US: Framatome Celebrates Grand Opening of Nuclear Parts Center at Expanded Solutions Complex

Framatome today celebrated the grand opening of its Nuclear Parts Center (NPC) at the expanded Solutions Complex in Campbell County, Virginia. The NPC provides the nuclear energy industry with 24/7, year-round access to an extensive spare parts inventory, guaranteed stocking programs, supply chain management and technical support.

Over the past year, Framatome expanded its Solutions Complex on Mount Athos Road to house the NPC, which was previously located on Old Forest Road in Lynchburg, Virginia, behind the corporate headquarters building. Framatome relocated approximately 35 employees and nearly 27,000 products as part of the move.

“Centralizing the Nuclear Parts Center at Framatome’s Solutions Complex at Mount Athos Road allows us to make the best use of our existing space and the resources necessary to support the facilities and operations,” said Gary Mignogna, president and CEO of Framatome in North America. “This move further demonstrates our commitment to the greater Lynchburg region, which has been home to our company for more than 50 years. It also makes available a facility that has the flexibility to suit any number of companies interested in relocating to or expanding within the region.”

Framatome is a major international player in the nuclear energy market focused on designing, building, maintaining and advancing the global nuclear fleet. In North America, Framatome Inc. combines U.S. and Canadian leadership to deliver innovative solutions and value-added technologies to support the operation of the commercial nuclear fleet and prepare for the next generation of nuclear power plants. Leveraging the expertise of its 2,300 North American employees, Framatome Inc. is helping its customers improve the safety and performance of their nuclear plants and achieve their economic and societal goals.
