

Welcome to the future of digital knowledge in nuclear technology

Dive into flexible, digital training that makes learning a breeze.

Challenge

Most workplace accidents are caused – or at least not prevented – by human behavior, underscoring that influencing behaviors before an accident is key! A proactive safety culture focuses on preventing incidents by addressing risks and behaviors upfront.

Solution

We proactively address this gap using scientific and modern educational approaches. Safety must feel personally relevant. The responsibility for safety must be embraced broadly across the entire organization to increase the critical mass of safety advocates.

Customer benefits

Modern learning principles are reflected and integrated for maximum impact
100 % digital, learning with on-demand videos, animation films and podcasts designed by leading experts
At the end of the week, participants join a live expert call to discuss and deepen knowledge

Key figures

More than 250 people trained in 2025.

91% likelihood that customers will recommend our courses.

Your performance
is **our** everyday **commitment**
