

Cybersecurity Solutions

Monitor and Protect

Reliable, sustainable and independent cybersecurity solutions for industries.

Challenge

Businesses in almost every industry rely on critical digital infrastructure and systems to run their operations. The digital connections and communication among systems and personnel must be constantly monitored and protected with proven cybersecurity solutions. In many cases, cybersecurity programs must also meet constantly-evolving regulatory requirements and standards. Finding an experienced provider with access to the highest quality cybersecurity products and vendors, and knowledge of regulations and best practices for incident monitoring and response can be difficult. In addition, monitoring and protection solutions must operate with minimal to no interruption to plant operations. Businesses need timely and efficient monitoring, reporting and recommendations from their cybersecurity systems without disruption to productivity.

Solution

Framatome Cybersecurity Solutions are backed by our unmatched experience in the energy infrastructure industry. Our programs are designed to fully leverage existing plant programs, processes and procedures, and to seamlessly integrate to help ensure adequate protection, meet any required standards or regulatory requirements, and provide opportunities to reduce the ongoing operational cybersecurity program costs.

The Framatome team brings decades of experience in cyber and physical security for plants around the world, specializing in plant engineering, software quality assurance, verification & validation, and licensing and regulatory standards compliance. Our diverse capabilities enable us to take a holistic approach to cybersecurity program implementation, while developing customer solutions to provide the level of cybersecurity support to meet your operations' specific needs. Framatome has also developed a robust supply chain to deliver a comprehensive suite of proven security solutions focused on lowering risk and minimizing your total cost of ownership. Our proven track record of deploying continuous monitoring and protection cybersecurity solutions can provide the highest return for your business, with the lowest impact to productivity.

**Your performance
is our everyday commitment**

Technical information

“Monitor & Protect” implementation phase of Framatome’s cybersecurity proposal includes

- Security by design
- Architecture and system security including
 - Software and hardware hardening
 - Software patch supply and integration
 - Secure gateways integration
- Detection and monitoring solutions integration

Customer benefits

Solutions fully leverage existing programs and seamlessly integrate to provide:

- Assurance of the level of protection
- Compliance with standards and regulatory requirements
- Potential reduction in ongoing cybersecurity program costs
- Confidence from a seamless solution with a single point of accountability

Framatome Cybersecurity solutions grow with your business making them a solid foundation for capabilities expansion.
