Training Solutions 2021

# IC academy

**With more than 40 years of training experience, Framatome's full training portfolio includes courses on virtually every aspect of nuclear power plant construction and operation. We also design individually tailored training programs and courses to suit our customers' specific requirements. Our long-standing relationships with global experts, utilities, and institutions give us the necessary expertise to offer valuable insights into nuclear safety policy and procedures.**

**Our training solutions focus on:**

- Certified, experienced instructors and experts in all fields of nuclear technology
- Competent advice and support regarding your intended training goals
- Practical courses with applied training on real-life systems
- Training curriculum customized to your needs
- High-quality training materials individually tailored for each course and customer

## Our promise to you

Framatome offers comprehensive training solutions for the development, construction and maintenance of nuclear power plants. Our IC academy is home to world-leading experts in the industry, ready to share their know-how and experience with your operational teams. Framatome delivers the training programs you need to help you achieve your team's development goals.

## Your performance

is **our** everyday **commitment**

# TRAINING LOCATIONS

**Framatome offers extensive system and operations training at our modern training facilities or on-site at customer locations worldwide.**

 **France**

Framatome France offers instrumentation and control trainings drawn from decades of operational experience and best practices. Courses are available at Framatome sites in Lyon and Paris, as well as at actual plant sites like Flamanville. To ensure the best training for all customers, classroom and hands-on instruction are provided by our training experts.

 **Germany**

For more than 40 years Framatome has provided extensive training courses covering both nuclear plant construction and operation at our Training Center in Karlstein and Erlangen. Comprehensive instrumentation and control training is further supported by actual platforms and component mock-ups allowing participants to learn in realistic environments.

**USA**

Located in Lynchburg, Va., Framatome's Technical Training Center is located on 3.5 acres, with full-scale mock-ups, classrooms, offices, and labs to meet the growing nuclear site maintenance needs in the U.S. and around the world. Course participants receive classroom and hands-on training for plant-specific instrumentation and control configurations and new procedures in a safe, realistic environment.

**China****Slovakia**

We also offer instrumentation and control academy training courses near customer locations in China and Slovakia for our local customers in Asia and Eastern Europe. The full list of courses is continually expanding and is also available in customers' native language. Our teams of trainers look forward to welcoming you at one of the Framatome facilities, or provide training at your local facility.

# FOXBORO CONTROL SOFTWARE

## Process Operations

DURATION	LOCATION	LANGUAGES
3 days	  Customer on-site / Worldwide	 English

### TARGET GROUP

Operators

### OBJECTIVES

- Use the devices provided by the operator's station to access displays, overlays, and environments, and to determine variables that are operator-changeable.
- Given a typical process situation, recognize the occurrence of a process alarm, determine the cause, and provide the appropriate response.
- Operate the standard Foxboro faceplate displays and custom graphical displays.
- Observe variations in process conditions and review historical data using real-time trends.
- Demonstrate the method of access and the information presented in operational reports and in scheduled and on-demand custom process reports.
- In the event of a failure, acknowledge the system alarm and identify the failed component.

### CONTENT

This course provides the background necessary to perform procedures normally encountered by a Process Operator in the control room. Through a series of simulated control schemes in this course, you identify the mechanics of operating the FoxView interface and interacting with typical process displays. This course is ideal for personnel who are responsible for day-to-day operations in a plant.

### PREREQUISITES

Prior control room experience using pneumatic, electronic, or digital systems

### OTHER INFORMATION

This course is delivered by Schneider Electric Process Automation Learning Services.
