**IC academy**  
Training Solutions 2021

# IC academy

**With more than 40 years of training experience, Framatome's full training portfolio includes courses on virtually every aspect of nuclear power plant construction and operation. We also design individually tailored training programs and courses to suit our customers' specific requirements. Our long-standing relationships with global experts, utilities, and institutions give us the necessary expertise to offer valuable insights into nuclear safety policy and procedures.**

**Our training solutions focus on:**

- Certified, experienced instructors and experts in all fields of nuclear technology
- Competent advice and support regarding your intended training goals
- Practical courses with applied training on real-life systems
- Training curriculum customized to your needs
- High-quality training materials individually tailored for each course and customer

## Our promise to you

Framatome offers comprehensive training solutions for the development, construction and maintenance of nuclear power plants. Our IC academy is home to world-leading experts in the industry, ready to share their know-how and experience with your operational teams. Framatome delivers the training programs you need to help you achieve your team's development goals.

## Your performance

is **our** everyday **commitment**

# TRAINING LOCATIONS

**Framatome offers extensive system and operations training at our modern training facilities or on-site at customer locations worldwide.**

 **France**

Framatome France offers instrumentation and control trainings drawn from decades of operational experience and best practices. Courses are available at Framatome sites in Lyon and Paris, as well as at actual plant sites like Flamanville. To ensure the best training for all customers, classroom and hands-on instruction are provided by our training experts.

 **Germany**

For more than 40 years Framatome has provided extensive training courses covering both nuclear plant construction and operation at our Training Center in Karlstein and Erlangen. Comprehensive instrumentation and control training is further supported by actual platforms and component mock-ups allowing participants to learn in realistic environments.

**USA**

Located in Lynchburg, Va., Framatome's Technical Training Center is located on 3.5 acres, with full-scale mock-ups, classrooms, offices, and labs to meet the growing nuclear site maintenance needs in the U.S. and around the world. Course participants receive classroom and hands-on training for plant-specific instrumentation and control configurations and new procedures in a safe, realistic environment.

**China****Slovakia**

We also offer instrumentation and control academy training courses near customer locations in China and Slovakia for our local customers in Asia and Eastern Europe. The full list of courses is continually expanding and is also available in customers' native language. Our teams of trainers look forward to welcoming you at one of the Framatome facilities, or provide training at your local facility.

# SVDU TRAINING

## Graphics Building and Application

| DURATION | LOCATION  | LANGUAGES  |
|----------|---|--|
| 5 days   |  <br>Customer on-site / Worldwide | <br>English |

### TARGET GROUP

SVDU Application Engineers

### OBJECTIVES

To provide practical knowledge and experience with SVDU graphics application development using the ACCIS Display Builder Tool:

- Setup and Installation of the Display Builder Tool
- System Administrative Tasks
- Use of Graphical Objects, Widgets, and Templates
- Applying Connections
- Understanding the Eclipse Platform
- Performing Resource Editing
- Creating a New Display Project
- Testing the Display Project

### CONTENT

The 5-day course progresses through SVDU overview; display building essentials; navigation; including the Eclipse platform; the HSI Display Builder application; menu and toolbar items; resource editing; creating a new display project with templates; widgets; and connection statements; and testing the application. Advanced topics include editing XML and runtime examples. The class concludes with operational topics, runtime modifications, and permissions-based display access.

### PREREQUISITES

Knowledge of Process and Flow Control, Tricon, QNX, SVDU (Safety Video Display Unit)

### OTHER INFORMATION

This course requires the SVDU unit(s) and Tricon configuration for hands-on experience and skills development; 2 students per lab setup. Alternatively, a PC and Virtual Machine configurations.
