

Shipment activities

For components up to 1000 tons

Outstanding shipment capabilities to support customers worldwide deliveries

Challenge

Transport very large, complex and highly valuable components with the most effective and secure transportation means. Master the transportation processes meeting international regulations, quality and safety requirements.

Solution

Framatome supplies heavy components for nuclear power plants with the highest level of safety and quality standards. Regardless the method of transportation (truck, ship, plane) and incoterm, our decades of experience especially make Framatome a uniquely qualified supplier for the transport of components worldwide.

Framatome proposes an integrated solution from transport definition to final delivery on customer site :

- Feasibility study and travel optimization
- Documentation and Quality process management
- Design and procurement of special tools and packaging
- Qualification of technical means to be employed
- Overall management of the supply chain
- Customs procedures and administrative authorizations
- Monitoring and inspection all along transportation

Our solutions are available to any kind of industries : Oil & Gas, Aerospace, Chemical, Pharmaceutical, Special Tooling, Ship Industry and Navy, Defense, Small Modular Reactors, Advanced reactors...

Customer benefits

- Safety and Quality Conformity
- Internationally trusted supplier with a proven experience
- Capability to transport exceptionally large components in size and weight
- Flexible and large industrial capacity
- A skilled and dedicated team managing the whole transportation process
