

Resident Engineer

Framatome's Resident Engineer holistic approach contributes to operate better and cheaper any nuclear power plant with a facilitated access to best practices, skills and technologies.

Challenge

Nuclear Power Plant operators face increasing challenges to preserve economic balance in operating their facilities with decreasing electricity prices and Safety Authorities requiring the highest level of safety.

Our customers need access to personnel that have knowledge of best practices and lessons learned from the global operating fleet in order to take full advantage of reactor operations experience.

Solution

The Framatome Resident Engineer is fully integrated within the operator's teams, to have the full understanding of existing challenges and constraints.

The Resident Engineer analyzes issues and provides the best engineering solution to each challenge. Thanks to its extended experience acquired in different nuclear facilities across the world, the Framatome Resident Engineer supports the operator to optimize expenditures, with an approach based on sound engineering practice and real return on investment.

Customer Benefits

- Single point of contact
- Real-time feedback about lessons learned and best practices for similar nuclear facilities
- Expert input to return on investment decision-making
- Faster problem solving with direct access to the Resident Engineer's extensive knowledge and Framatome's portfolio of solutions
- Acts as a partner committed to achieving improved performance and cost reduction on behalf of the owner/operator

**Your performance
is our everyday commitment**

Framatome Resident Engineer

Technical information

The Resident Engineer is the Framatome technical reference within the operator's organization, supporting our customers in their daily challenges.

In addition the Resident Engineer helps to optimize plant performance by offering proven solutions from Framatome's global experience and references.

Major Resident Engineer Roles:

- Single interface for services and solutions
- Assistance with holistic and transverse solutions to diverse, unique, and emerging problems
- Identifies proven methods, processes, and analytical techniques

Key figures

Program established in **1984**

In 2019, more than **15 Resident Engineers** deployed in **8 countries**

Highly beneficial to **outage preparation & execution**
