

Remote inspection service

Supervise the production of your components

Inspection of the manufacturing operations is key to ensure the fulfillment of all requirements. It involves several stakeholders during the production period.

Challenge

Inspection activities impose plenty of constraints to inspectors such as business trips with related costs and risks, adoption of specific safety instructions in workshops or flexibility of their inspection schedule to stick to production rate.

Solution

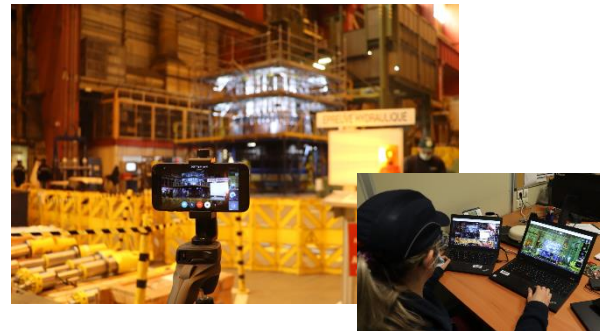

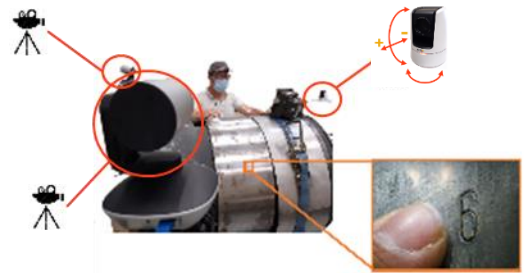

Framatome developed and qualified a remote inspection tool enabling to supervise components production in your workshops or in suppliers' ones.

Precise and versatile, this system allows you to observe all kind of manufacturing activities as if you were on site. Confidentiality of information is ensured thanks to a strong securing of the video streaming. Nevertheless, it remains simple to use, as you can login from everywhere and on every type of device (pc, pad, smartphone).

Customers Benefits

- Remove costs and risks related to travels for inspections
- Increase of productivity of inspection tasks
- Ease schedule management of inspectors by suppressing time and issues linked to business trips
- Speed-up the execution of modified inspection plans
- If needed, reach instantly experts

Your performance
is our everyday **commitment**
